Muhammad Rowaim Safdar

AI AUTOMATION ENGINEER

Islamabad, Pakistan (open to remote) | +92 346 2808493 | rowaimsafdar@gmail.com | linkedin.com/in/rowaimsafdar | github.com/RowaimSafdar

PROFESSIONAL SUMMARY

AI Automation Engineer and technical lead with 4+ years designing and shipping AI-powered systems, AI agents, and RAG applications for enterprise and multinational operations. Analyze the business problem, design the architecture, and lead delivery end to end, from backend and API development through cloud deployment. Currently lead a team of 6 developers and work directly with department heads to turn their requirements into production systems. Strong track record of building agentic AI and automation that removes manual work and scales across teams, including a 2nd-place win in the Huawei China & Middle East GDE AI Competition.

CORE SKILLS

Languages: Python (primary), JavaScript, TypeScript, SQL

AI & LLM: AI agents & agentic systems, RAG & vector databases, LLM integration (Claude, OpenAI GPT), LangChain, prompt engineering, MCP server development and deployment

Backend & Frontend: FastAPI, REST APIs, webhooks, Node.js, React, Next.js

Automation & Integration: n8n, RPA, workflow orchestration, CRM and third-party API integrations

Databases: PostgreSQL, MongoDB, Supabase, vector databases

Cloud & DevOps: Huawei Cloud, AWS (EC2, S3), Google Cloud, Docker & Docker Compose, Linux, Bash, CI/CD (GitHub Actions), Terraform, Ansible, Kubernetes (basic), Git

PROFESSIONAL EXPERIENCE

AI Automation Engineer & Team Lead May 2026 - Present

Nysonian Inc. | Islamabad, Pakistan

- **Team Leadership & Architecture:** lead a team of 6 developers and work directly with department heads across marketing, support, operations, and finance, gathering their requirements, designing the architecture, and shipping the solutions that meet them.
- **CEO Task Automation Agent:** built an AI agent for the CEO and leadership that reads the messages managers send and what is said in meetings, automatically extracts action items and assigns each to the right owner, and shows productivity and efficiency trends on a dashboard with a human approval step, replacing manual tracking.
- **6 Custom MCP Servers:** built and deployed six MCP servers connecting Claude to systems including Google Workspace, Aircall, and Shopify (with in-house PostgreSQL and MongoDB). Internal brand databases are exposed through scoped, read-only access with audit logging for control and data security.
- **Agentic Customer Service (n8n):** built an n8n-based AI agent that resolves customer requests on its own, such as order modifications, address changes, and cancellations, by taking real actions through APIs rather than only answering questions.
- **Lead-Generation Pipeline:** built a Python, PostgreSQL, and n8n system that finds and AI-scores US retailers for relevance, filters out competitors, and runs an automated email nurture sequence across brands.
- **Deployment:** ship services with Docker on AWS EC2 (Ubuntu Linux), with CI/CD and scheduled automation.

Lead Python Automation Engineer / Solution Architect Oct 2022 - May 2026

Huawei Technologies | Islamabad, Pakistan

- **Team & Solution Leadership:** led a team of up to 10 engineers as solution architect, gathered requirements, designed the architecture, and delivered 50+ automation solutions across seven markets, cutting operational cost by up to 80%.
- **RAG Knowledge Assistant:** designed a Retrieval-Augmented Generation system on Huawei Cloud that indexes PDF, Word, and Markdown knowledge in a vector database and answers staff questions about business processes and equipment, guiding new and existing employees step by step and sharply cutting onboarding and knowledge-transfer time.

- **Award-Winning MCP System (GDE AI Competition, 2nd Place):** built a client and server MCP system with 30+ custom Python tools for data and document automation, processing user queries and documents from the enterprise document system.
- **RPA & Reporting Automation:** built RPA bots and Python automations across enterprise operations, including email and notification automation, server log analysis, issue tracking, and configuration conversions, plus a logistics bot for warehouse-to-site fulfillment and reporting dashboards (DataFab, Excel) for productivity and system health, saving 6+ hours daily and cutting manual effort by 70%+.
- **AI Assistant Platform:** built an AI business and coding assistant on Huawei Cloud using LangChain to support debugging and business-process automation.

EARLIER EXPERIENCE

Junior Executive, NADRA (2022): national-scale data systems, records processing, and Linux backup-server monitoring. Visiting Lecturer, KUST (2021): taught undergraduate programming and introduction to computing.

EDUCATION

BS in Computer Science, CGPA 3.9 / 4.0
Kohat University of Science & Technology (KUST) | 2017 - 2021

Level 6 Diploma in Artificial Intelligence Operations (AIOps)
Alnafi International College, accredited by EduQual (UK) | 2024 - 2026
Four pillars: AI, DevOps, Cloud, and Cybersecurity, with hands-on projects across Docker, Kubernetes, Terraform, Ansible, CI/CD, AWS, and Linux.

LANGUAGES

English (Professional working proficiency) • Urdu (Native / Fluent) • Pashto (Native)
